Samantha Sanders

Front-End Developer

samantha.k.sanders@gmail.com   +64 22 317 3321

Key skills

- Excellent grasp of CSS architecture at scale (BEM, ITCSS).
- Highly focused on building accessible user experiences.
- Ability to build rich interactions through CSS and progressively enhanced vanilla JavaScript.
- Proficient at working with various templating languages (Jinja2, Django, Twig).
- Comfortable conducting staff/client training and peer code reviews.
- Experience writing ES6/ES2015 JavaScript, using Node-based tooling (Babel, module bundlers).
- Experience with build tools and pre-/post-processors – npm, Gulp, Sass, Webpack, Browserify.
- Version control via SVN and Git – issue trackers and pull requests.
- Familiarity with PHP, Python, Django and Wagtail CMS.

Employment history

Front-End Developer, Springload, Wellington

Aug 2013 – present

I build front-end code for responsive websites and applications, help our growing front-end team write scalable maintainable CSS, and ensure websites are built in an accessible and progressively enhanced manner. Key projects include the redevelopment of the New Zealand Red Cross, REANNZ, RealMe and the Kiwibank public site.

Web Developer, Spark Digital, Melbourne

Aug 2012 – Jul 2013

Responsible for building responsive websites, Facebook applications, email templates, and WordPress content management systems. We were a very small team so it was important for me to be on top of new technologies and ideas as the industry developed. This helped me collaborate with our designer to provide better project design concepts.

Front-End Developer, DTDigital, Melbourne

Jun 2012 – Jul 2012

Translating designs into HTML, CSS and Javascript. With short time lines diligence was key while working on large existing code bases for the Bank of Melbourne, Officeworks, BMW and Myer.

Analyst & Graphic Designer, McNamara Research, Wellington

Aug 2011 – May 2012

Monitoring and analysis of conventional communications data for government and private sector clients, as well as the design and layout of formal reports to be presented to those clients.

Education

Bachelor of Fine Arts in Graphic Design

Canterbury University, 2007–2010

Diploma of Web Development

Natcoll Design Technology, 2011–2012
